

BRAIN MIND & CONSCIOUSNESS SOCIETY

has raised the question:
How can understanding human behavior advance the long-term prosperity and sustainability of living systems on planet earth?

BMC²

BRAIN MIND & CONSCIOUSNESS CONFERENCE

MAY 5-10 2013

INAUGURAL THEME:

achieving **Human Sustainability**

The Brain, Mind, and Consciousness Conference is a unique, student-created educational conference held over six days at UC Santa Cruz.

GOALS:

To seek a transdisciplinary definition of sustainability that engages and integrates all academic disciplines.

To inspire student-led, extracurricular education and new projects that promote human sustainability.

To forge new connections between students, academic disciplines, student organizations, and the community.

All events are free for students.
